Attorney Docket: 256657.000 Customer No. 054042

IN THE CLAIMS:

Please replace all previously pending claims with the listing of claims set forth below:

- 1-7. (Canceled)
- 8. (Currently Amended) A therapeutic method for the treatment of calcifications in a soft tissue, comprising topically administering to a patient having such a condition, a composition comprising a pathological calcification treating effective amount of myo-inositol hexaphosphate or a pharmaceutically acceptable salt thereof as an active ingredient, wherein said myo-inositol hexaphosphate or a pharmaceutically acceptable salt thereof can be absorbed by the skin, passing into the bloodstream and acting where the calcification is generated in said soft tissue.
- (Previously Presented) The method of Claim 8, wherein the soft tissue is subepithelial tissue.
- 10. (Previously Presented) The method of Claim 8, wherein the soft tissue is renal tissue.
- 11. (Previously Presented) The method of Claim 8, wherein the soft tissue is pulmonary tissue.
- 12. (Previously Presented) The method of Claim 8, wherein the soft tissue is cerebral tissue.
- 13. (Previously Presented) The method of Claim 8, wherein the soft tissue is the wall of a blood vessel.
- 14. (Currently Amended) A therapeutic method for the prevention of the development of a pathological calcification in a soft tissue of a patient, which comprises topically administering to the patient a composition comprising a pathological calcification preventing effective amount of myo-inositol hexaphosphate or a pharmaceutically acceptable salt thereof as an active ingredient, wherein said myo-inositol hexaphosphate or pharmaceutically acceptable salt thereof can be absorbed by the skin, passing into the bloodstream and acting where the calcification is generated in said soft tissue.
